"It's a thought," Wellesley agreed distantly. He cast his eyes round the table. "Does anybody have a better idea?" Nobody did. "So let's get Merrick here and talk to him," Wellesley said. He sat back and placed his hands on the edge of the table. "This would be a good time to break for lunch. Scribe, adjourn the session here. We will reconvene in ninety minutes. Contact Leighton Merrick in Engineering, and have him join us then. Also ask him to bring with him two of his more capable officers. Advise me at once if there are any difficulties. That's all." Borftein headed a force still formidable, its backbone virtually all of Stormbel's SD's. Because these elements needed to believe, they allowed Kalens to convince them that the presence of Chironians inside Phoenix was the cause of everything that had gone wrong. If the Chironians were ejected from the organism, health would be restored, the absented Terrans would return, normality would reign and prosper, and the road to perfecting the dream would be free and unobstructed.. Micky finished her coffee in long swallows, as though she had forgotten it wasn't spiked, and though she. Bernard shook his head. "No. We're in touch with them but Wellesley vetoed any mention of it." Colman nodded. He wouldn't have risked their deciding to fire first either. Bernard went on, "Wellesley's tried contacting the Battle Module too, but Sterm won't talk. We sure he'll keep the module attached until after the attack goes in- in other words if he doesn't pull it off and gets blasted, we all get blasted. The same thing applies if the Chironians decide to press the button. We have to assume he's on a forty-minute countdown, Hanlon and Annley are on their way there, and Sirocco left a few minutes ago. Borftein is sending through everybody he can scrape together. What are the chances?" Sirocco smiled tiredly. "You're excused from taking off your boots," he murmured..In fact, he has no idea where he's going. He's not familiar with this land. Civilization might lie within. In the end, everything is a gag. ?Charlie Chaplin. four rioters were left behind with sore heads or other minor injuries. While the Company medic began cleaning up the injured and Sirocco stood talking with the SD commander a short distance away, Colman watched Kalens's limousine drive away in the opposite direction and disappear. That was how it had always been, he could see now. For thousands of years men had bled and died so that others might be chauffeured to their mansions. They had sacrificed themselves because they had never been able to penetrate the carefully woven curtain that obscured the truth-the curtain that they had been conditioned not to be able to see through or to think about. But the Chironians had never had the conditioning..and the embarrassment of chronic dandruff, they don't want a bunch of ignorant rubes poking around..This was nice. Quiet. Placing a nonstick cotton pad over the punctures. Opening a roll of two-inch-wide. But they were less forthcoming about details of their administrative system, which had evidently departed far from the well-ordered pattern laid down in the guidelines they were supposed

to have followed. The guidelines had specified electoral procedures to be adopted when the first generation attained puberty. The intention had been not so much to establish an active decision-making process there and then--the computers were quite capable of handling the things that mattered but to instill at an early age the notion of representative government and the principle of a ruling elite, thus laying the psychological foundations for a functioning social order that could easily be absorbed intact into the approved scheme of things at some later date. From what little the Chironians had said, it seemed that the early generations had ignored the guidelines completely and possessed no governing system worth talking about at all, which was absurd since they appeared to be managing a thriving and technically advanced society and to be doing so, if the truth were admitted, fairly effectively. In other words, they had to be covering a lot of things up.. "Luck," Micky clarified. "The angle of the shot was severe. The slug literally ricocheted off her skull,.Kalens had evidently been working on the details for some time. He recovered the support of the commercial lobby by proposing that Chironian "nursery-school economics" be excluded from the enclave, and won the professional interests over with a plan to tie all exchanges of goods and services conducted within the boundary to a special issue of currency to be underwritten by the Mayflower II's bank. The Chironians who lived and worked inside the prescribed limits would be free to come and go and to remain resident if they desired, provided that they recognize and observe Terran law. If they did not, they would be subject to the same enforcement as anyone else. If its integrity was threatened by disruptive external influences, the enclave would be defended as national territory.. "But who decides who works here? Who appoints them to their jobs?".to consider the taste?as though she has drunk orange juice before..that graphic..to his sister-becoming, he blunders after her into the waterless bog without adjusting his pace or step. He. "What alternative?".memories, Micky had been cooking for half an hour when a small sweet voice asked, "Are you suicidal?". "WE'LL TAKE CARE of that." Colman turned his head and called in a louder voice, "Stanislau, Young-come over here and give me a hand with this crate." Rifles slung across theft backs, Stanislau and Young stepped away from the squad standing on the sidewalk and helped Colman to heave the crate into the truck waiting to leave for the border checkpoint, while the Chironian who had been struggling to lift it with his teenage son watched. As they pushed the crate back into the truck, it dislodged the tarpaulin covering an open box to reveal a high-power rifle lying among the domestic oddments. The Chironian saw it and lifted his head to look at Colman curiously. Colman threw the tarp back over the box and tuned away..contortion. He teeters but keeps his balance and puts his shaggy burden down on the floor of the. "I've got one too," Veronica whispered, bringing her face. 'Would they accept a job like that?' Jean asked, sounding dubious,.Driscoll turned his eyes a fraction to the side. They widened in disbelief as one of the Kuan-Yin's steel colossi marched into view, holding a length of aluminum alloy tubing over its left shoulder and being followed by a brown, Indian-looking gift of about seven and a fair-halted boy of around the same age..Although it seemed unrelated to Leilani Klonk, Micky recalled something that her aunt Geneva had said. "She ought to've been paid to take it. Anyway, they put old Sinsemilla in an institution once and shot like. When the boy looks out the window in the driver's door, he sees a familiar vehicle streaking past, faster. A carrier full of combat-suited infantry nursing antitank missile launchers and demolition equipment slid through the lock and lurched onto a branch leading to one of the Battle Module's forward ramps. "Well, we've got a clear run all the way down one feeder, and we're moving into the others," Colman replied. "There's been some fighting inside the Battle Module, and a lot of the guys got out. We have to hope that there aren't enough left to stop us from blowing our way in through four places at once. Just tell Borftein to keep sending through all the heavy stuff he can find, as fast as he can get his hands on it.". Even as he thought that, Eve's words about brainwashing came back to him. Yes, he was willing to concede that he had been through the same processes as everyone else, and that could be why he was unable in his mind to dissociate wealth and status from material possessions. But even if a sufficiently advanced society could supply possessions in an abundance great enough to make their restriction purposeless, that still couldn't equate to unlimited wealth, surely. The very notion was a contradiction in terms, for wealth by definition meant something that was highly valued and in limited supply. In other words, if on Chiron possessions did not equate to wealth and thereby satisfy the universal human hunger to be judged a success, then what did?
