Jay introduced them as Chang, Rastus, and Murphy, which confused Bernard because Murphy was the Chinese, Chang the black, and Rastus the white. Bernard had some misgivings to start with, but they looked decent enough; and if they had been listening to Beethoven, he decided, they

After twenty years of the familiar day-today and month-to-month routine of life aboard the Mayflower li, she missed the warmth and protectiveness that she had grown to know and yearned to be back amid the sane, civilized surroundings that she understood. She understood a way of life in which budget and necessity decided priorities of need, in which clear rules set limits of behavior, and where tried and trusted protocols defined role and function-her own as well as everybody else's; she did not understand, or even want to understand, the swirling ocean of anarchy in which she now found herself, in which individuals were expected to flounder helplessly like paper boats tossed in a tempest, with no charted shores, no havens of anchor, and no guiding stars. She had no place in it, and she desired no place in it. "No, of course not," Fallows said, not very happily. Okasotaka proposed the name kami for the two basic components, after the ancient Japanese deifications of the forces of Nature. The Japanese gods had possessed two souls—one gentle, nigami-tama; and one violent, aramitama—and, accordingly, Okasotaka christened his two species of kami "nigions" and "araons," which a committee on international standards solemnly ratified and enshrined into the officially recognized nomenclature of physics. Schriber found a memory aid to the various triplet combinations by humming things like "dee-dum-dum" to himself for the "up" quark, "dum-dee-dee" for the "down" antiquark, and "dum-dum-dum" for the positron, and therefore called them "dums" and "dees," upon which his students promptly coined "tweedle" for the general term, and much to the chagrin of the custodians of scientific dignity these versions came to be adopted through common usage by the rest of the world's scientific community, who soon tired of reciting "nigi-nigi-ara" and the like to each other. The scientists were less receptive to Schriber's claim that Quantum Mechanics had at last been unified with Relativity. "Weaselly enough attorney can find a justification for virtually any murder, but there's no excuse for a tacky." "Logging on early," Waiters replied. "Merrick wants to talk to you for a minute before you go off duty. He told me to tell you to stop by the ECD. You can take off now and see him on the company's time." He moved over to the console and nodded at the array of screens. "How are we doing? Lots of wild and exciting things happening?" "Other than himself. Hell, it was like driving a Mercedes-Benz." "Did you ask him about it?" "Uh-huh." "And?" lay squinted into the distance and scratched his head. "Pretty much what I expected. Nothing personal; you're an okay guy; if it was up to him, things would be different, but it's not—stuff like that. But he was only saying that so as not to sound mean—I could tell. It goes deeper than that. It's not a case of it being up to him or not. He really believes in it. How do people get like that?" "Expectancy." EARLY THAT EVENING, Sirocco presented himself at the Transportation Controller's office in the Canaveral shuttle base to advise that D Company had arrived for embarkation as ordered. Capacity had been scheduled since morning, and the Controller did no more than raise his eyebrows and check the computer to verify the change; it didn't make any difference to him which company the Army decided to move up to the ship as long as their number was no more than he had been expecting. An hour later the company marched off the shuttle in smart order, and after clearing the docking-bay area in Vandenberg, dispersed inconspicuously to their various destinations around the Mayflower 11. Speed was now critical since only so much time could elapse before somebody realized a replacement unit from the surface hadn't shown up where it was supposed to.
