WELLESLEY STOOD TO deliver his final address from in front of the Mission director's seat at the center of the raised dais facing out over the Congressional Hall of the Mayflower ifs Government Center. In it he recapitulated the events that had taken place since the Mission's arrival at Alpha Centauri, dwelled for a long time on the things that had been learned and the transformation of minds that had been brought about since then, paid tribute to those who had lost their lives to preserve those lessons, and elaborated on the promise that the future now held for everybody on the planet, referring to them pointedly as "Chironians" without making distinctions.. "They have merely to comply with the law to avoid such consequences.", "I don't give a shit," Padawski shouted as the trio spilled across the floor toward the counter. "I don't give a goddamn shit, I tell ya. If that asshole wants to--" His voice broke off suddenly. "Say, who've we got over here? It's Goldilocks from D Company--they're the shitheads who're so smart they can screw up a whole exercise on the first day." Colman felt the floor vibrate as heavy footfalls approached the booth. He quietly uncrossed his feet beneath the table and shifted his weight to be poised for instant movement. His fingers curled more snugly around the half-full cup of hot coffee. He looked up to find Padawski leering down from about three feet away..Enjoying the girl's perplexity, Micky shrugged. "I'm not sure I could have resisted him, either." "I just did." Chapter 19. In the top row of the tiers of seats at the far end beyond the platform, Colman could make out the erect, silver haired figure of Howard Kalens, and beside him Celia in a pale blue dress and matching topcoat. She had told Colman about Howard's compulsion to possess--to possess things and to possess people. He felt threatened by any thing or anyone that he couldn't command. Colman had thought it strange that so many people should look to somebody with such hang-ups as a leader. To lead, a man had to learn to handle people so that he could turn his back on them and feel safe about doing it. Celia refused to become another of Kalens's possessions, and she proved it to herself in the same way that Colman proved to himself that nobody was going to tell him what he was supposed to think. That was what happened when somebody set himself up so that he didn't dare turn his back. Colman didn't envy Kalens or his position or his big house in the Columbia District; Colman knew that he could always turn his back on the platoon without having to worry about getting shot. They should issue all the VIPs up in the benches M32s, Colman thought. Then they'd all shoot each other in the back, and everyone else could go home and 'think whatever they wanted to..Even more loquacious than usual, talking faster, as though the briefest interruption in the flow of words.A short silence fell while the meeting digested the observation. Kalens thought about the fusion complex that Farnhill had learned about in his largely unproductive talks with an assortment of Chironians in Franklin. Kalens had sent Farnhill off to learn what he could through more casual contact and conversation, after Borfein's sarcastic remark to the effect that the Army's company of misfits seemed to be making better progress with the natives than the diplomats were managing. "Yes.. . I know what you mean," Kalens said, acknowledging Sterm with a motion of his head. "As a matter of fact, we have already begun inquiries along those lines." He turned toward Farnhill. "Amery, tell us again about that place along the coast." The motor-home horn blares. In fact the noisy night sounds like a honk-if-you-love-Jesus moment at a." The woman is either nuts or higher than a Navajo shaman with a one-pound-a-day peyote habit." "I think it will he all fight if Kalens gets elected," Terry told them. "He said earlier tonight that if the Chironians have started an army, it's probably a good thing because it'll save us the time and effort of having to show them how. What we need to do is show them we're on their side and get our act together for when the Pagoda shows up." The EAF starship was designed differently from the Mayflower II. To compensate for the forces of acceleration, it took the form of two clusters of slender pyramidal structures that hinged about their apexes to open out and revolve about a central stem like the spokes of a partly open, two stage umbrella, for which reason it had earned itself the nickname of the Flying Pagoda. Terry sipped her drink and looked around the table. "The guy's got it figured realistically. You see, there's no need for a fight. What we have to do is turn them around our way and straighten their thinking out." Speed 300 miles per second; distance to destination, 493 million miles. Course-correction effected to bring the ship round onto its final approach.. "Of course not, dear. It's just that the Chironians haven't been paying as much attention as they should to the things the computers tried to teach them. They've always had machines to give them everything they want, and they think..bad idea. Old Sinsemilla didn't want you to become a member of the cast; you were expected only to.to feel, a darker quality. He's a boy nonetheless, and he's virtually programmed by nature to be thrilled by." "I've got trouble with the satisfied part," Leilani said..girl mean bidness!". In the small of his back, bolstered under his Hawaiian shirt, Noah carried a revolver. He didn't think he." Your Chevy? It was a piece of crap." "Have you seen the news this evening?" Jean asked. "Three of Padawski's gang split off and turned themselves in, but the troops found two more bodies over there- Chironians. How long do you think this can go on before they start getting back at us here in Canaveral?". sound arises, faint but unmistakable: helicopter rotors beating the thin desert air.. "Oh, Lord." Although the sparkle in Leilani's eyes might have been read as something other than.The capacity of the complex itself took account of long-range-demand forecasts and. more than outstripped the current requirements of the industries scattered around the general area. Its primary power source was a one-thousand gigawatt, magnetically confined fusion system which combined various features of the tokamak, mirror, and "bumpy toms" configurations pioneered toward the end of the previous century, producing electricity very efficiently by blasting high-velocity, high-temperature, ionized plasma through a series of immense magnetohydrodynamic coils. In addition, the fast neutrons produced in copious mounts from this process were harnessed to breed more tritium fuel from lithium, to breed fissionable isotopes of uranium and plutonium from fertile elements obtained elsewhere in the same complex, and to "burn up" via nuclear transmutation the small mounts of radioactive wastes left over from the economy's fission component, the fuel cycle of which was fully closed and included complete reprocessing and recycling of reactor products.. "Just a friendly chat . . . about your government,

how it's organized, who's in it . . . a few things like that. It won't take long at all." He's rapidly losing confidence. Lacking adequate self-assurance, no fugitive can maintain a credible. "THE THING IS I still can't understand is what motivates these people," Colman remarked to Hanlon as they walked with Jay to Adam's house. "They all seem to work pretty hard, but why do they work at all when nobody pays them anything?". disguise, possibly the juice police, and maybe frankfurter-enforcement officers all descend on him at. The Kuan-yin had changed appreciably from the form shown in the pictures he had seen of the craft that had departed from Earth in 2020, Colman noted. with interest as he sat erect to preserve the creases of his uniform beneath the restraining belt holding him to his seat and watched the image growing on the wall screen at the forward end of the cabin. The original design had taken the form of a dumbbell, with fuel storage and the thermonuclear pulse engines concentrated at one end, and the computers and sensitive reconnaissance instruments carried at the far end of a long, connecting, structural boom to keep them safely away from drive-section radiation. The modifications added after 2015 for creating and accommodating the first Chironians had entailed extensions to the instrumentation module and the incorporation of auxiliary motors which would spin the dumbbell about its center after arrival in order to simulate gravity for the new occupants while the first surface base was being prepared. CHAPTER THIRTY FIVE. see which way he would go. "Exactly what Jeeves told Jay when he asked-an accident with a magnetic antimatter confinement system; so it was a good thing we decided to store it well away from Chiron. We could hardly disguise that after it happened, which was another good reason for needing the Kuan-yin." "But . . . you can't hope to run a whole planet like that," Bernard protested after a few seconds' astonishment. "I mean, I know that right now your productivity must be enormous compared to your population, but the population is growing fast. You've got to start thinking about some kind of . . . system to regulate things. Your resources are only finite." the police. "Now you're in a gang with a future." once, blasting away. Micky was left speechless not by the child's acute perception but by hearing the truth put so bluntly, tightly in his fist. "You steal something, boy?". "Gone forward to the outer lock." Colman had been expecting something like that. "I know one unit of the Army that could do it," he said. "And they operate best when nobody's trying to organize them." After a hesitation, Leilani said, "Dr. Doom says he's had this vision that we'll both be healed by. Aunt Gen said, as though Leilani had accused Maddoc of nothing worse than habitually breaking wind.
