But I don't remember Swley being around." though unintentionally he flings off one of his sandals.. IN A FAINT and inconstant breeze, waves stir through the lush meadow. At this lonely hour, in this. "I don't know," Brad replied. "I haven't been in on it at the top level. But it's medium-to-long range, and for some reason it has to be synchronized with the ship's orbital period." The beam sliced across space for a little over one second to the Point where the Battle Module was hanging in orbit above Chiron, and then a miniature new sun flared in the sky to light up the dark side of the planet. The flash of gamma rays ionized the upper atmosphere, and the sky above Chiron glowed in streak- that extended for thousands of miles. Sensitive radiation-monitoring instruments were CHAP! F.M THIRTY-NINE burned out all over the outside of the Mayflower II, and because of the electrical upheaval, it was twelve hours before communications with the surface could be resumed.. The Lion-yin's lower orbit put it out of synchronism with the Mayflower 11 and resulted in the two vessels being shielded from each other by Chiron's mass for a

period of thirty-two minutes every three-and-a-quarter hours. The sixteen Devastator missiles would be launched from the Battle Module while the Mayflower II was screened from the Kuan-yin's retaliatory fire. One salvo would be programmed to follow planet-grazing courses that would bring them up low and fast from points all around Chiron's rim, while the second salvo, launched a few minutes earlier, would swing wide and out into space to come back in at the Kuan-yin from various directions at the rear, the flights being timed so that they all converged upon the Chironian weapon simultaneously. A mass the size of the Kuan-yin could not maneuver rapidly, and the worst-case simulations run on the computers had shown an overwhelming margin in favor of the attack, whatever authorities. He shoved the currency into his pockets once more. "I never travel." In the end Kalens rallied everybody to a consensus with a proposal to formally declare a Terran enclave within Canaveral City, delimited by a clear boundary inside which Terran law would be proclaimed and enforced. The Iberia proposal would require months, he told Lechat, whereas the immediate issue to be resolved was that of Terran security. In any case, it could hardly be carried out without an electoral mandate. The enclave would preserve intact a functioning and internally consistent community which could be transplanted at some later date if the electoral results so directed, and therefore represented as much of a step in the direction that Lechat was advocating as could be realistically expected for the time being. Lechat was forced to agree up to a point and felt himself obliged to go along. Problems, a pleasing face wasn't just about looking good; it was about survival. Lechat glanced uneasily in Celia's direction for a moment and then looked back. "Howard Kalens," he said in a lower voice. "Couldn't that have been a final warning? Look at the effect it's having on the Army, except that they don't seem to be reading the right things into it." He looked at Jay. "I can't see that they've got it all figured out. They can't have." Micky was left speechless not by the child's acute perception but by hearing the truth put so bluntly. The rhythmic thuds of marching feet died away and were replaced by the background sounds of daily life aboard the Kuan-yin--the voice of a girl calling numbers ~ of some kind to somebody in the observatory on the level above, children's laughter floating distantly through an open door at the other end of the narrow corridor behind Driscoll, and the low whine of machinery. A muted throbbing built up from below, causing the floor to vibrate for a few seconds. Footsteps and a snatch of voices came from the right before being shut off abruptly by a closing door. Of seeing that make the night as penetrable as daylight. Mind to him, Curtis. He's had every opportunity to be normal his whole life, but he's always chosen to be. For a while after listening to Lechat, she had entertained a brief hope that his announcement might precipitate a landslide of opinion that would force a more enlightened official policy, but the hope had faded a mere two hours later when Eve and Jerry stopped by for a brief farewell before moving out to take up the Chironian way of living. Apparently many people were doing the same thing, and there were even rumors of desertions from the Army; Jean had been unable to avoid feeling that Eve and Jerry were somehow deserting her too, but she had managed to keep a pleasant face and wish them well. It was as if Chiron were conspiring against her personally to tear down her world and destroy every facet of the life she had known. Even as the troops are pouring out of the trailer, a helmetless man throws open the passenger's-side. Jay nodded and pointed to the view of one of Chiron's moons, which was showing between the clouds up near one of the corners. "That's Remus," he said. "The painting was done over a year ago, and if you look at it you can see that whoever painted it paid a lot of attention to detail. I spent a lot of time reading about this star system and its planets, and when I got to looking at Remus in this picture, I realized there was something funny about it." Jay's finger moved closer to indicate a smooth region of Remus's surface, sandwiched between two prominent darker features, probably large craters. "I was sure that in the most recent pictures I'd looked at from the Chironian databank, those two craters are connected by another one, where this unbroken area is . . . a big one, several hundred miles across. When I checked, I found I was right--there's a huge crater right here, and it wasn't there a year ago." Lechat nodded and seemed satisfied. "That gets us up there," he said. "Now what about getting into the Communications Center?" CHAPTER TEN. though not as deep as coma. She'd probably lie limp and unresponsive until late morning. supposed to have them at night, only in high-demand hours. Maybe it's just an ordinary screw-up." she had rudely presumed to monitor and restrict Micky's use of alcohol. Such meddling required relationship as that of the cross-species siblings they could become, brother and sister of the heart. Lechat told Fulmire that he no longer thought it advisable to attempt setting up a Terran community alongside the totally unfamiliar experience of Franklin--at least, not immediately, The Terrans would need time to readjust, and in the meantime they would cling to their own familiar ways and customs. The proximity of Franklin would only cause tensions. Lechat believed, therefore, that the migration to the surface should be halted completely, the existing plans abandoned, and a new Terran settlement established elsewhere for the transition period. An area called Iberia, on the south coast of western Selene, would be a suitable place, he thought. Lechat didn't know what would happen after that and doubted very much if anything could be predicted with confidence, but for the nearer term it would be the answer both to giving the general population a chance to settle in without disruptive influences, and the extremists an opportunity to cool down and do some more thinking. "They weren't," Jay protested. "That was the first thing that we thought too, but we watched the other people in there and we talked to the robot that runs the place, and he said that's what you do. They've got fusion plants and big, automatic factories down underground that produce everything anybody could want, and it's all so cheap to make everything that nobody bothers charging . . . or something like that. I can't figure it out." "The half that's left is off-limits," Micky declared. "The only pie in play is my piece." also burned from her all illusions.
